Amendments to the Specification

Please delete the heading "SUMMARY OF THE INVENTION" provided on page 4, line 5.

Please amend the paragraph beginning on page 4, line 20 as follows:

Also according to the invention, a method for managing a plurality of data files stored in a storage area for a web browser is provided. The method comprising the steps of indexing the stored data files in a database to provide a database index; generating automated search strings based on the stored data files in the storage area; searching the database according to the automated search ~~stings~~ <u>strings</u>; and identifying data files associated with the search strings.

Please amend the paragraph beginning on page 16, line 1 as follows (Please note that this paragraph was also amended in the response filed on March 29, 2004):

The user can also edit existing searches in step 510 by selecting one of the searches displayed in window 1442. Fig. 10A shows three illustrative search strings the user may edit: <u>"http://abouttmcs.com/images/call_back.gif"</u> ~~"http://abouttmcss.com/images/call_back.gif"~~, which is an Internet web site; "Name = !widget! or !cookie!", which is a structured query; and "widget1104.jpg", which is a file name. Illustratively, the user has selected the search string <u>"http://abouttmcs.com/images/call_back.gif"</u> ~~"http://abouttmcss.com/images/call_back.gif"~~ to edit in text edit box 1444, as depicted by step 550. The user can either edit or delete the selected string in step 560.
